SureMDM
Powered by 42Gears UEM

Secure. Monitor. Manage.

Using mobile devices has become a necessity for all organizations. In today's digital world, it is difficult for businesses to be competitive without a sound mobility strategy. While the use of mobile devices results in increased efficiency and productivity, it also poses challenges in terms of data security and asset management.

42Gears SureMDM addresses complex mobile device management and security challenges with comprehensive features. These features ensure a simple, safe and easy way to manage variety of corporate-owned as well as BYO devices.
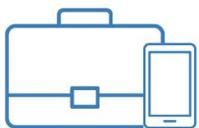

Easy Set Up and Mass Configuration
Setting up and enrolling mobile devices in SureMDM is quick and easy. You can simply download the Nix agent on the device and assign it to an account for enrollment, or use a QR code or out-of-the-box enrollment to seamlessly set up and enroll a large number of devices.

SureMDM Web Console for Centralized Management
SureMDM allows you to monitor, secure and manage all enrolled mobile devices using a web-based console. With this console, you can have a centralized view of all enrolled devices and apply security and EMM profiles to devices and device groups remotely.

42Gears UEM and Android Enterprise
42Gears is a Google recognized ZTE EMM partner. SureMDM, powered by 42Gears UEM, makes it easy for IT pros to set up and deploy corporate-owned Android devices with necessary settings when turned on after unboxing.

Over 10,000 companies in 115 countries around the world use 42Gears products for secure and efficient deployment of mobile applications on a wide variety of devices such as smartphones, tablets, desktops, laptops, smartwears, VR and IoT devices.

Key Features:

Device Security
Secure devices using features like remote locking/wiping of enterprise data, password policies, app filtering, remote app updates, device peripherals lock and more.

Remote Control
Silently install and update applications over-the-air on devices. Remotely view device screen and monitor, locate, track and control enrolled mobile devices.

iOS Screen Sharing
Remotely view end user's iPhone or iPad screens through built-in screen recording feature and ensure easy remote support.

Wearable Support
Remotely monitor and manage settings and applications in Android Smartwatches.

AI Powered Virtual Assistant Chatbot
Use voice commands in the world's first UEM Virtual Assistant chatbot to easily navigate through MDM functionalities and complex data.

Advanced Analytics Engine
Integrate third-party apps with SureMDM Analytics Engine for advanced reports and analysis.

Mobile Threat Detection
Protect devices against security threats, identify non-compliant devices and remotely revoke access to corporate resources like email and VPN.

iOS VPP Support
Purchase and distribute apps in volume from the central console directly to different Apple devices such as iPhones, iPads and Macs.

Mass Deployment Program
Seamlessly set up and deploy corporate-owned devices with mass deployment programs such as Device Enrollment Program (Apple), Zero Touch Enrollment (Google), Knox Mass Enrollment (Samsung), StageNow (Zebra) and Windows Autopilot (Microsoft) Program.

Things Management
Remotely monitor and manage "not-so-smart" endpoints such as handheld scanners, cash registers, card reader, smart bulbs, smart plugs, etc. from a single console.

VR Device Management
Remotely manage and lockdown Virtual Reality devices and turn them into dedicated purpose tools.

Mobile Email Management
Enforce security compliance policies and encrypt sensitive corporate data to safeguard corporate emails from threats.

Office 365 Support
Define and enforce security policies across Office 365 apps and email on both employee-owned and corporate-owned mobile devices.
