SafeGuard C-Frame™
Personalise your customer experience

The C-Frame is an innovative, universal tablet enclosure. The cleverly designed inner sleeve accomodates 10" tablets. Use it for stand-alone desk, counter or wall mounted applications or turn that tablet into an intrinsic element within a Mobile Point of Sale (MPoS) solution.
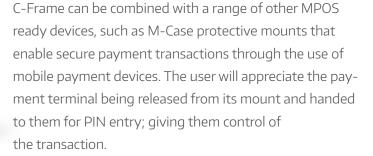

Perfectly suited and specifically designed for MPoS applications, C-Frame has a mounting option, which combines it with a cash drawer housing. Both high and low mount versions are available. The high mount version comes with a rotation element as standard, for use on either a counter top or when mounted to a cash drawer, bringing the maximum flexibility to the operator and customer.

Reflect your personal style and business individuality with the wide range of colours available. Installed anywhere, C-Frame provides protection from damage whilst still looking great.

MPoS

MPoS allows for flexibility in placement and frees up valuable counter space. MPoS has spawned a range of apps, designer peripherals including mobile payment devices and mini, Bluetooth enabled printers - all the functionality that any retail environment would expect at a fraction of the investment, but with an enhanced look and feel and a completely transformed customer experience.

C-Frame can be combined with a range of other MPOS ready devices, such as M-Case protective mounts that enable secure payment transactions through the use of mobile payment devices. The user will appreciate the payment terminal being released from its mount and handed to them for PIN entry; giving them control of the transaction.

Fixed and mobile solutions, which utilise tablets in particular, need to answer the challenges that users find on a daily basis. Discreet cable management means that charging requirements are taken care of with ease. Bluetooth connectivity looks after the peripherals and security options protect your investment. With C-Frame, at the heart of your solution, MPoS can deliver.

Counter or wall mount

C-Frame is at home wherever it is needed. Used as a check-in as part of a hospitality application for example, a wall mounted C-Frame frees up space, looks great, and brings an immediate positive customer experience.

On a desk or counter, it brings style to a stand-alone application, whether that be in an office environment, hotel reception or self-service location. C-Frame delivers flair, elegance and sophistication, wherever you want to do business.
