

CMT-30

30-bay Docking Cabinet for Opticon models OPN-2001 and OPN-2002

This unique 30-bay docking cabinet can handle any mix of up to thirty OPN-2001's and OPN-2002's. Needs only one power outlet to charge all 30 scanners at once. The cabinet can be used on a desk, or wall-mounted with the wall mount kit (accessory).

CMT-30 shown with OPN-2001's and OPN-2002's (scanners NOT included)

Power cable can exit on left or right side

The cabinet is equipped with a power extension block, supplying power to the power adapters of the three 10-port USB hubs. When wall mounted, the EU power mains cable and USB communication cables can exit both on the left or right side from the cabinet through the side notches.

For communication one, two or all three hubs can be connected to a PC with a standard USB A – miniB cable (cable that came with one of the OPN scanners). Each connected scanner will create it's own Virtual Comm Port (VCP) on the PC.

SPECIFICATIONS

PHYSICAL

dimensions (W x D x H): 452 x 295 x 295 mm / 17.8 x 11.61 x 11.65 in
weight : 6.4 kg / 14.11 lb
case material : ABS-HH
case color : black
case surface : sand grain
mounting : three mounting holes in the back-plate (separate wall mount kit available)

CONNECTIONS

power connection : 1 x EU 230V AC power cable
communication : up to 3 x USB cable to a PC (10 scanners per USB connection cable)

SOFTWARE

driver : dock itself needs no drivers (PC needs the appropriate driver for the OPN's connected)

POWER

power supply : internal power extension block feeding the power adapters of the three 10-port USB hubs
power adapters (hubs) : input 100-240Vac 50/60Hz, output 5V/2A
