

IS3480 QuantumE™

QuantumE™ is a compact, omnidirectional bar code scanner ideal for integration with Original Equipment Manufacturer (OEM) devices.

Metrologic's QuantumE is a combination omnidirectional and single-line laser bar code scanner. The omnidirectional scan pattern offers outstanding scan performance on all standard 1D bar code symbologies, including RSS. The button-activated single line mode aids in scanning items that contain multiple bar codes or when selecting bar codes from menu-style price sheets.

QuantumE is designed for integration with a variety of devices including interactive kiosks, price lookup systems, ATM's, reverse vending machines, controlled access, or a host of other Original Equipment Manufacturer (OEM) devices. The scanner's main cable connector is located at the top of the unit to facilitate mounting and the

auxiliary connector gives users access to several of the I/O signals, providing the flexibility for external hookup of beepers, buttons, and LED's.

The unique shape of QuantumE allows the unit to be mounted in slim profile systems, taking up as little space as a typical flat screen monitor. In addition, QuantumE features a sweet-spot mode that audibly indicates the best mounting location for optimum scanning in a fixed application. Most importantly, the QuantumE is equipped with powerful and cost saving features such as easy programming, user replaceable cables and upgradeable software that protects your investment.
