SafeGuard Dock & Charge™

Connectivity, where and how you want it

Click and carry

Few enterprise mobility applications are solely mobile. A tablet enclosure that protects on the move and connects when static, optimises the automated workflow process. Operatives need a lightweight but durable enclosure, which can quickly be docked and charged at a workstation, which suits each user's personal enterprise mobility requirements.

The new Dock & Charge for Ergonomic Solutions brings that connectivity wherever your business operates. Desk and floor mounts all provide integrated power management and provides stability for charging and network connection - from fixed uses to mobile applications, and back again.

Maximum usability

The SafeGuard Dock & Charge with its integrated intelligent charging capability is a hard wearing tablet enclosure designed for Apple Air generation iPads and the Galaxy Tab S, Tab S2, Tab A and Tab 4.

The tablet is locked into the enclosure, which itself can be undocked from its charging base, making it ideal for mixed static and mobile applications.

When mobile, Dock & Charge can be combined with our OpenSpace range of accessories, to maximize the tablet's use whilst protecting hardware investment.

DOCK & CHARGE: 10 GOOD REASONS

Fast, secure and seamless locking and charging of the product

Multi-tablet: one enclosure fits six different tablets

Protects the hardware from theft and abuse

Combines the advantages of both fixed and mobile user environments

Easy to use, good hand grip

Mounts and charges itself and additional devices via MicroUSB, e.g. payment devices

Suitable for several markets and verticals

Compatible with peripherals, hand strap and shoulder strap

Fits recent product range and design line

Compatible with: Apple iPad Air & Air 2, Samsung Galaxy Tab 4, Tab S, Tab S2 & Tab A

Information in any location - your key personnel can make decisions, or serve customers, on the move.
