TapeCreator Pro

CUSTOM TAPE PRINTER

Offer your customers fully customised tape rolls from 1 to 66 metres in length with no minimum order quantities required.

Quick and easy to set-up and use, tapes can be made in minutes while your customer waits.

- Wide range of tape widths and colour combinations.
- High quality thermal transfer printing.
- Tape design software for PC included.
- Include company logos, clipart and frames.
- Hundreds of pre-defined templates available for speedy design.
- No minimum order quantities required - print from just one roll.
- High profit margins.

TapeCreator Pro
CUSTOM TAPE PRINTER

Create fully customised tapes in minutes!

With the Brother TP-M5000N TapeCreator Pro, you can create high quality adhesive packing and shipping tape or fabric ribbon, personalised with logos, photos and custom messaging on-demand. Simple to set-up and use, the high print resolution and fast print speed ensure that your customer gets quality customised rolls, without the traditional waiting time and minimum order quantities normally required.

Features

Control panel and backlit LCD to show currently installed consumables

300dpi print resolution and fast 220mm/second print speed

USB 2.0 and 10/100 Base-TX network interfaces

Automatic cutter to cut the tape to the correct length

Tape window to view current status of tape window and printing

Easy to operate

The TP-M5000N TapeCreator Pro has a front loading system to give quick access to the ink ribbon and tape roll. These are supplied on easy-to-install cartridges that simply slot-in to the machine. Integrated sensors on the cartridges ensure that there is enough tape or ink ribbon available for the length of roll requested by your customer, meaning no wasted or misprinted rolls.

P-touch Editor tape design software

The supplied P-touch Editor tape design software has hundreds of symbols, frames and clip-art to choose from and can use any of your installed fonts to give you virtually endless design possibilities. When printed, your design simply repeats down the tape to the desired length of roll selected.

Applications

Packaging with custom logo and address

Return address labelling

Customised gift messaging

Personalisation

Instructions/guidance marking

Safety signage

Versatile

The TP-M5000N TapeCreator Pro can be connected by USB cable, or using the integrated 10/100 Base-TX network connection. This allows multiple users to design and print tapes as required, or gives you the flexibility to site the printer away from the PC. Various tape/ink colours and widths, along with the unlimited tape design possibilities mean that the TP-M5000N TapeCreator Pro can meet the needs of your customers.

The simple process of creating customised rolls

1. Install the required size and colour of tape and ink cassette, along with the roll core.

2. Design your label using the supplied P-touch Editor tape design software.

3. Choose the length of tape required, and print. The tape is then automatically printed and wound onto the core.

Supplies and Accessories

Tape Cassette
