

tabloc

POWERED BY VLOC

Tablet computer management. Revolutionised.

Tabloc is the ultimate all-in-one solution for securing, charging, and managing your tablet computers.

Are your tablet devices always going missing?

Our compact and efficient tablet computer management solution, Tabloc has the power to **put a stop to tablet theft, loss, and damage overnight.**

Asset shrinkage harms productivity, causing disruptions in workflow as you wait or search for available tablets. Replacing missing devices can be costly too.

Tabloc ensures tablets are stored in a secure location, charged, and ready to use straight away, saving you valuable time and money.

Lock

Store tablets securely to protect them from theft and access by unauthorised users.

Charge

Keep tablets charged when not in use, so there's always some ready for the next shift.

Manage

Organise, audit, and account for your devices easily, reaching new heights of efficiency.

Why use Tabloc?

Streamline operations

Ensuring tablet computers are always available to employees is paramount to maintaining smooth operations. Tabloc enables improved asset management, minimising downtime and maximising productivity.

Save money

Tabloc helps to significantly reduce physical damage to tablet computers, extending their lifespan and minimising repair costs. It also ensures fewer tablets go missing, allowing you to cut the costs of device replacement.

Enhance security

By providing a secure housing for your tablets between shifts, Tabloc helps protect devices from theft, loss, and damage. It presents a future-proof approach to mitigating these risks and safeguarding your assets.

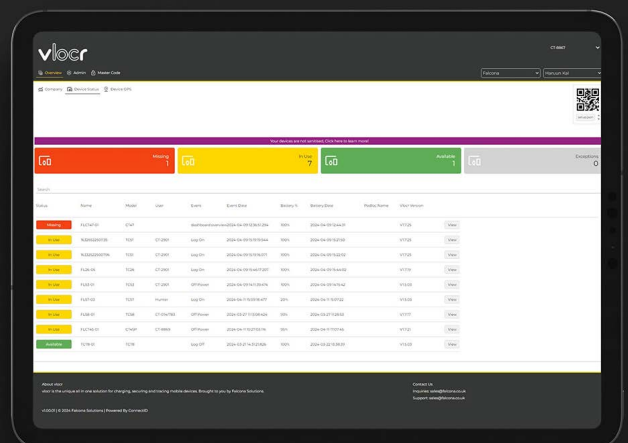

Promote accountability

Tabloc operates on a simple drop-and-go system, ideal for fast-paced working environments where employees need independence. Staff are responsible for returning their devices, encouraging accountability.

POWERED BY VLOC R

Tabloc works with Vlocr asset management software, enabling easy device tracking and 24/7 visibility.
